

# CORNER GUARDS

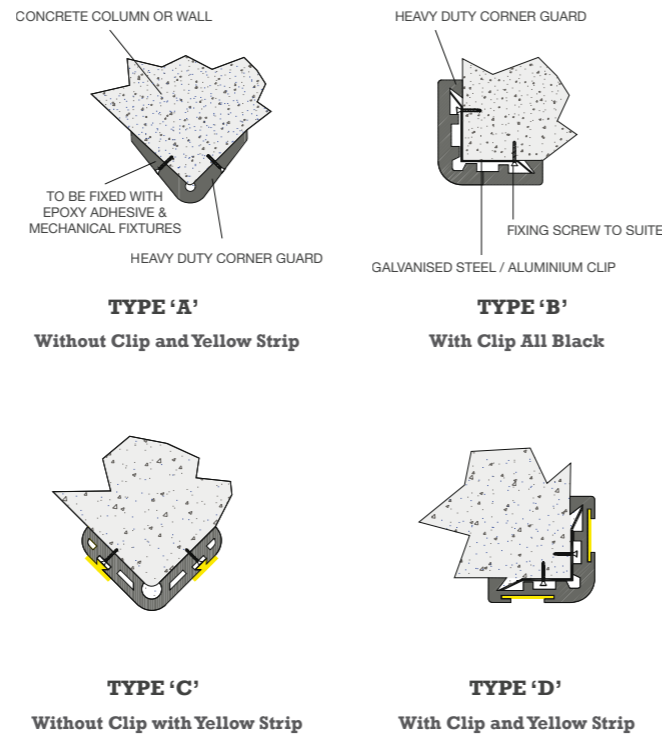

## Assemble/Installation:

### With Metal backup sheet:

Fix the metal backup plate on the wall by drilling 6 holes in a 'Z' formation (diagonally opposite)  
Fasten with GI screw and rawl plug M6 x 40 mm  
Slide the rubber profile over the fixed metal sheet to complete the fixing process.

### Without Metal backup sheet:

Fix using a combination of epoxy adhesive and mechanical fasteners (GI flat head screw) size between 4-6 mm as per desired lengths

## Sizes Available

Wing Size(mm)	55x55	65x65	75x75	90x90	100x100	120x120
---------------	-------	-------	-------	-------	---------	---------

<b>Standard Lengths:</b> 1 metre, 1.2 metre and 1.5 metre

Corner Guards are designed to give drivers the maximum visibility using black and yellow stripes, the correct hazard warning colours. The solid rubber buffer's wrap-around design protects your property corners, columns and entrances that are exposed to vehicle and warehouse traffic.

The corner guards can be securely fitted to concrete or brickwork, plain or plastered.

Our corner guards come in options of all-black rubber extrusion and/or with illuminated yellow stripes on both arms of the guard.

Our corner guards are designed to take the impact from vehicular hits. While the metal retainers protect the concrete wall against impact, the rubber protects the vehicles from getting damaged.

Ismat corner guards come in a wide range to suit specific requirements.

# WALL GUARDS

## Sizes Available

Code	Width (A)	Thickness (B)
WG12030	120	30
WG15030	150	30

- All Dimensions in mm
- Available in Full Black and with Yellow strip
- Available in variable lengths

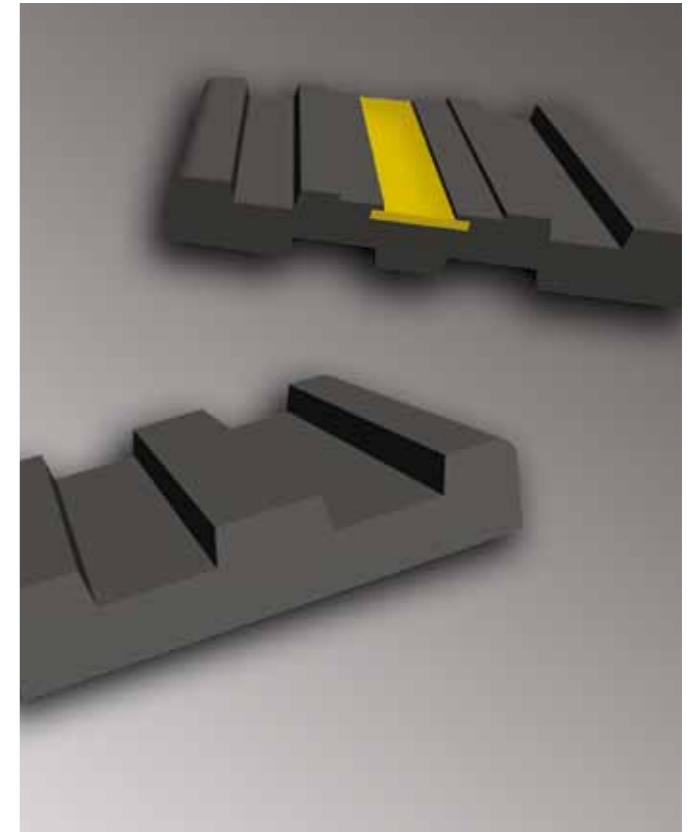

Overall Dimensional Tolerances ± 5%

A range of solid rubber Wall Guards designed to be easily and securely fixed to walls. The Guards can wrap around steel or concrete bollards, absorbing impact and reduce damage to property.

The Guard is supplied in a large range of thicknesses and widths.

The screw head is concealed in the recessed grooves, stopping any accidental damage to property or vehicles. This range of Buffers can be fixed horizontally or vertically along walls, Round columns and Ramp areas. The Wall Buffers can be fitted to many surfaces: brick, plaster, steel and concrete.

Designed to absorb impact damage in loading bays, service areas and car parks, the solid rubber guards are fixed at a distance of 500mm to accommodate the anchor bolts and reduce the risk of accidental damage. We supply the 'E' guards cut to the exact length to suit your site.
