# SPECIAL PANELS

A range of high quality and unique special panels and services are available from Eurodek® to add value and creativity to any project. Eurodek's Cementitious & Vision ranges provide sophisticated aesthetic qualities for the most demanding of environment or design brief.

cementitious

### **Eurodek® Cementitious**

Precision die formed steel panels are available from Eurodek® with an inert cementitious fill, suitable for areas with high rolling loads and to withstand high humidity's such as General Office Areas and Data Centres.

A screwdown facility is available to provide extra rigidity and stability and Eurodek's Cementitious panels deliver improved acoustic and fire performance. The cementitious fill makes floors quiet and solid under foot and is available with a number of high quality finishes to suit any requirement.

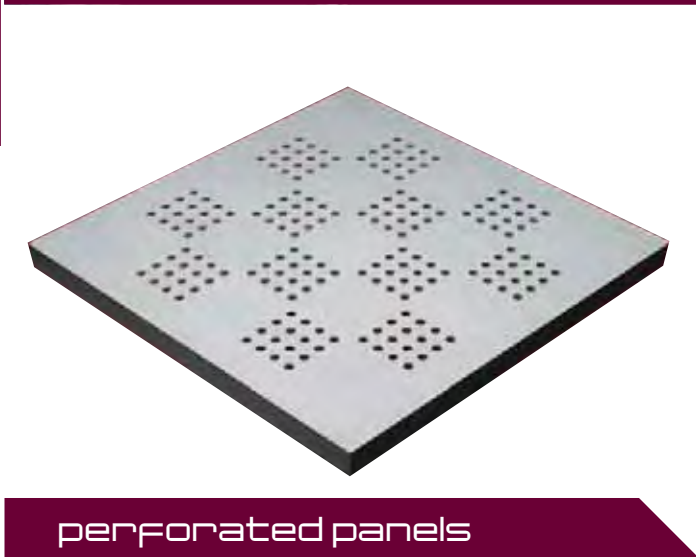

vision

### **Eurodek® Vision**

Eurodek's Vision range consists of a wide variety of compositions of glass vision panels supplied with a range of treatments including banding, etching and sandblasting. Ideal for allowing immediate vision into an access void, or as a decorative addition providing light in areas where no natural light is available, creating an atmosphere particularly in reception areas or lift lobbies.

Vision panels as standard are made up of double or triple layered glass with clear 1.52mm PVB between each layer. Toughened glass panels, and low Iron glass panels, providing perfect clarity, are also available.

perforated panels

### **Air Distribution**

A choice of Air Grilles and Perforated Panels are available where airflow distribution is required. Easily interchangeable with standard panels, these grilles and panels are ideal for data centres, computer suites and comms rooms where air circulation is important. Dampers can be included for precise control of airflow, and a variety of finish effects are also available. All Eurodek® grilles and perforated panels are made to order based on the thickness and/or performance requirements of each project, please contact our technical helpline.

### **Cut Outs**

Panels with Cut Outs are available to accommodate outlet boxes for power, telephone and network cabling and grommets, to enable relocation of workstations by allowing the panel to be moved and the cabling re-routed to the required position.

air grilles

**Please contact the Eurodek® Technical department on 08701 229948 for more information on special panels, finishes and services.**
