OUR PRODUCTS

Acronis

Acronis sets the standard for hybrid cloud data protection through its backup, disaster recovery, and secure file sync and share solutions. Powered by the Acronis AnyData Engine and set apart by its image technology, Acronis delivers easy, complete and affordable data protection of all files, applications and operating systems across any environment—virtual, physical, cloud and mobile.

Matrix Time-Attendance system is an automatic attendance marking system which records attendance data of an user and generates various reports for further action. It not only saves administrative cost but also facilitates HR to centrally manage attendance policies from multiple locations. HR can easily utilize the software for employee review, appraisals or monthly salary calculation. Automatic calculation of overtime, leave balance, enables managers to work efficiently. Its standalone or network based operation is ideal for schools, hospitals, government institutes, banks, remote sites, hotels, small/large enterprises and many more.

Xtend has unrivalled expertise in developing and delivering computer-based telephony solutions that can be implemented across enterprise for effective customer service. Since 1997, the company has pioneered a wide range of voice applications that cover the varied spectrum of telecom industry.

3CX Phone System is a software-based IP PBX that replaces a proprietary hardware PBX / PABX. 3CX's IP PBX is based on the SIP standard, making it easier to manage and allowing you to use any SIP phone (software or hardware).

Key benefits:

- Easier to install & manage via web-based configuration interface
- Cost effective to purchase and expand than a hardware-based PBX / PABX
- Improves productivity with presence, desktop based call control and extension management
- No need for separate phone wiring – phones use computer network, easy hot desking!
- Deliver mobility by allowing employees to work from home using a remote extension
- Choose between popular IP hardware phones or softphones – no vendor lock in
- Receive & Make calls via the standard PSTN using VoIP Gateways or cards
- Save on monthly call costs using SIP trunks, VoIP providers or Skype Connect!

ALLNET is a developer and manufacturer of advanced networking and communications technology. Many other innovative products in the areas of networking, storage, security and home automation are designed in own laboratories. Flexibility, Speed and Innovation ALLNET develops solutions, products and business models which meet the market demands of today and tomorrow.

The Main Categories are

- Power Over Ethernet
- Wireless LAN
- Network cameras
- KVM SWITCHES
- Print servers
- 19" racks
