DANA WATER COOLERS

"DANA" is the most familiar brand of drinking water coolers in the UAE with more than 40 years experience in designing equipments exclusively for standard and customized systems, we ensure the highest standards of quality for the global market. Our water coolers are used in worker Accommodations, Labour Camps, Mosques, Schools, Resturants. Our products are exported to Qatar, bahrain, Oman, Kuwait, kenya, Jordan, Saudi Arabia & vast number of other Arab Countries.

Key Features:-

- 1. Condensing Unit:- Heavy duty, Noisless, designed for the extreme desert conditions. Specially designed for countries with hot climates. Peak cooling capacity is taken at desert ambient 50C rated conditions to get chilled water at +12C to +5C.
- 2. Inner tank:- Fabricated hygienically with stainless steel 304GR fitted with leak proof hygienic attachments. The inner tank & outer body is insulated under pressure with CFC free polyurethane foam 50mm thick.
- 3. Drip Tray:- High quality & maintenance free drip proof taps are provided with splash proof grating on the drip tray to get a continuous fresh flow of water.

TROPICALISED

Specially designed for countries with hot climate. To cope with these extreme climate the copper tubing round the tank is covered with an aluminium conductive compound for better heat transfer

POLYURETHANE INSULATION

Polyurethane is injected under pressure between strong walls with great resultant strength and high insulation value Ozone friendly.

FAUCETS AND DRIP TRAY

The heavy plated drip proof faucets are located at a convenient height with the waste water tray to prevent splashing and facilitate easy removal of dirt

FLOAT VALVE/WATER INLET AND OUTLET CONNECTION

High quality nickel plated brass float valve and water inlet and outlet connections prevent rust and ensure most hygienic water.

COPER TUBE

The Copper tube around the tank is flattened so that the surface of the tube touching the water tank is increased by 70%. Also, Conductive Aluminium paste is placed in between the tube and the surface of the tank increasing the efficiency of the water cooler by 70%. As a result less electricity is consumed as the water is cooled much faster.

PLASTIC FEET

Prevents humidity from affecting the unit and in raining days allows water to flow under without damaging the equipment.

STAINLESS STEEL TANK

The open storage tank in high quality stainless steel 304 gaurantess crystal clear drinking water. Each tank is double tested, once before insulation and at the end of the production process to the highest standards of health and hygiene.
