## 489-115 Diamond Cup Wheels

### 7 Hole Dust Extraction Design

Provides the optimal and necessary combination of allowable airflow and debris removal when used with a vacuum.

### Steel Body Construction

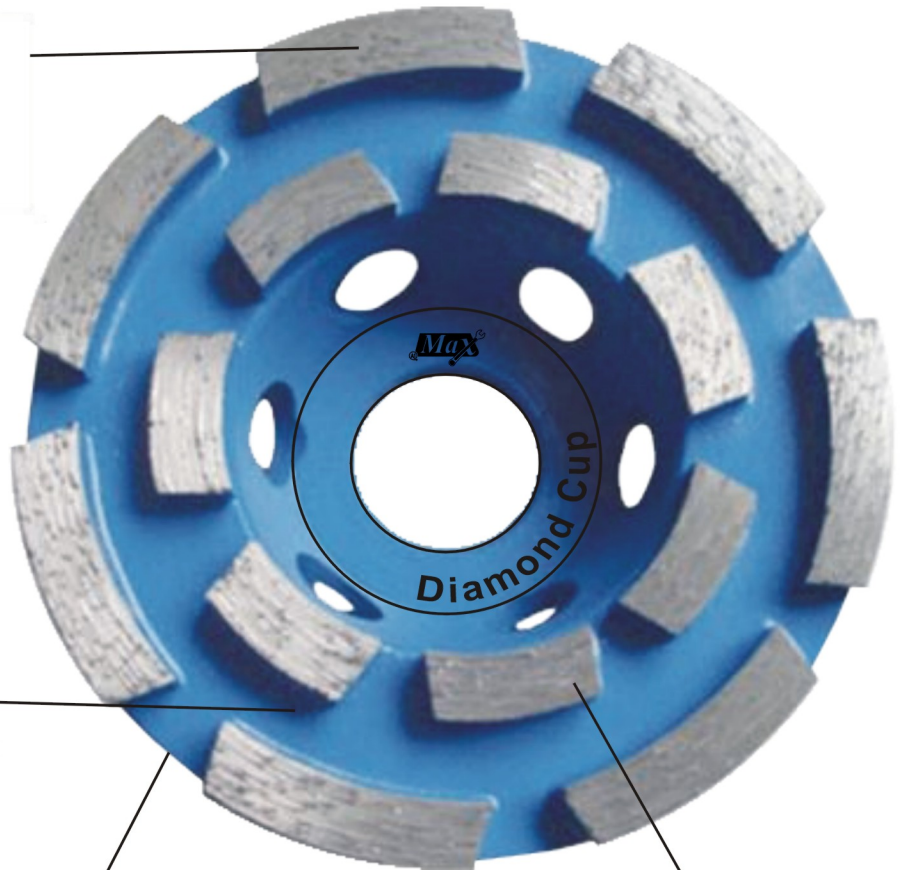

Holds up to the most demanding abuse. Reduces the chance of warping from heat build up during sustained use.

### High Grade Diamond

Stronger, high density diamond composition allows our diamond cup wheels to last longer giving better performance with

### 16 Diamond Segments

Designed to optimize a smooth and efficient removal of material. Three different compositions to choose from for specially targeted applications.

### Universal Usage

Wheels can be used with Any 4.5 grinders with a proper guard
