

Art. 398 MO-PLICK

Adhesive paper insect traps are designed for environments that need to combine the effectiveness of a device for fighting harmful insects with the aesthetics of an attractive looking object.

THE STRUCTURE

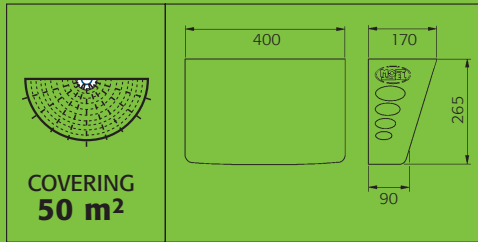

The external 1.2 mm thick stainless steel body pulls out easily to let you replace the sticking paper in just a few seconds, allowing for easy and quick cleaning.

THE LAMPS

The device is equipped with a high quality 20W UV-A lamp with a radius of approximately 50 m².

SAFETY

The model is built in conformity with CE standards and respects the current HACCP food processing standards.
