It is GEO Rental's objective to operate worldwide in a safe, responsible manner, which protects the environment as well as safeguarding the health and safety of our employees, our customers and the communities in which we operate. We are committed to promoting a culture and maintaining a framework that ensures continual improvements in environmental, health and safety performance by conducting the following:

Global Environmental, Health and Safety Policy Statement

- Recognising, evaluating and responsibly managing our environmental, health and safety risks through implementation of a comprehensive Global Environmental, Health and Safety Management System that standardises best operating practices, objectives, data collection, reporting, audits, performance indicators and goals.
- Performing every aspect of our business in compliance with applicable laws, regulations and industry standards.
- Carrying out formal audits, reviews and evaluations on all aspects of our business and setting annually reviewed objectives and targets for improvement against performance indicators to ensure compliance with this policy.

Considering environmental, health and safety issues in the design, maintenance and operation of our equipment fleet.

- Supplying safe and reliable products and services to the marketplace, working in partnership with stakeholders including suppliers, customers, subcontractors and agents, to develop more sustainable products and services and ensuring all environmental issues of concern are addressed wherever possible.
- Promoting and demonstrating our commitment to pollution prevention, in particular by the reduction of exhaust and noise emissions, spillages and ozone depletion, by waste minimisation and recycling as well as by ensuring our readiness to deal with environmental issues.
- Timely communication of our business activities and the risks associated with our operations to employees, customers, governments and the communities we operate.
- Working diligently to prevent all incidents by engaging with employees and educating them in the implementation of this Policy.
- Integrating environmental, health and safety considerations into all relevant business decisions as a contribution towards sustainable development.
- The Board of Directors of GEO Rental will ensure that the necessary organisation and resources exist to facilitate the achievement of GEO Rental's environmental, health and safety goals. It is also the responsibility of each and every employee to implement this policy and live up to its commitments.

QA/ QC Management System

ISO 9001-2008 Certified

- In order to achieve the highest quality, GEO Rental has implemented ISO 9001-2008 methodologies throughout our organization. We expect our suppliers to do the same.

ISO 9001:2008

- ISO 9001:2008 sets out the criteria for a quality management system and is the only standard in the family that can be certified to. In fact ISO 9001:2008 is implemented by companies and organizations in over 170 countries.

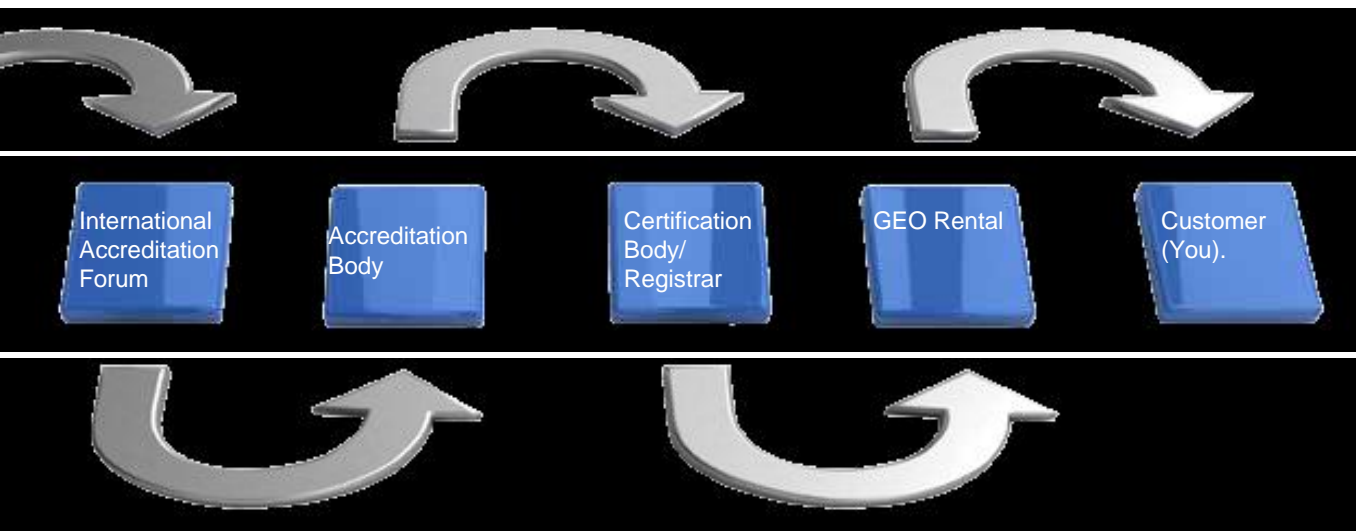

Quality Management Principles

- The standard is based on a number of quality management principles including a strong customer focus, the motivation and implication of top management, the process approach and continual improvement. Using ISO 9001:2008 helps ensure that customers get consistent, good quality products and services, which in turn brings many business benefits.

Audits

- Checking that the system works is a vital part of ISO 9001:2008. We perform internal audits to check how its quality management system is working. We invite an independent certification body to verify that it is in conformity to the standard.
- The foundation for our business is quality of our products and services. Though our people, products, and manufacturing techniques vary from country to country and factory to factory, the basic principles underlying sound quality practices do not change.
