ABOUT US

'**Makka Plastic**' is one among the leading distributors of Industrial Plastic and packaging Products in the UAE and all over GCC. As a well known player in the region, we feel extremely proud of our existing clients on their sincere support to maintain 'Makka Plastic' as undisputed leader in the industry and play key role in the market. Resulting 'Makka plastic' as a diversified company which stands on top against other plastic industries in the market. Our mode of operation and related supplies includes Airlines, Food and Beverages industries, Retail Agriculture & Petrochemicals units, Warehousing and Logistics, construction industries, Automotive, Pharmaceuticals etc.

'Makka Plastic' has a team of dedicated specialists who can manage in order to identify the best suitable solution at your available space. we are always keen in providing our customers the high quality products , competitive price , prompt delivery and excellent services.

MISSION

Complete solution for packaging industry with total employee involvement

VISION

To become a master in the field of packaging

FIBC Bags Types

FIBC/ JUMBO BAGS

Flexible Intermediate Bulk Containers (FIBC) are widely used for storage, transportation and handling of powder, flake or granular materials. Typically they are constructed from woven polypropylene (PP) fabric in the form of cubic bags. The fabric used may be a single layer, with extra loose liner, or laminated. The UV treated PP is a good electrical insulator.

FIBCs, also called big bags, bulk bags or jumbo bags, FIBCs have a very low packaging weight and are safe to use and available in various different forms. In 90 percent of cases, we custom make the FIBC for our customers. In doing so, we take into account the filling and discharging conditions, the hygroscopic properties and the density of the product being packaged.

DIFFERENT TYPES OF JUMBO BAGS MADE BY US.

Circular Type with Cross Corner / Corner Loops

U-panel / 4 Panel Bags

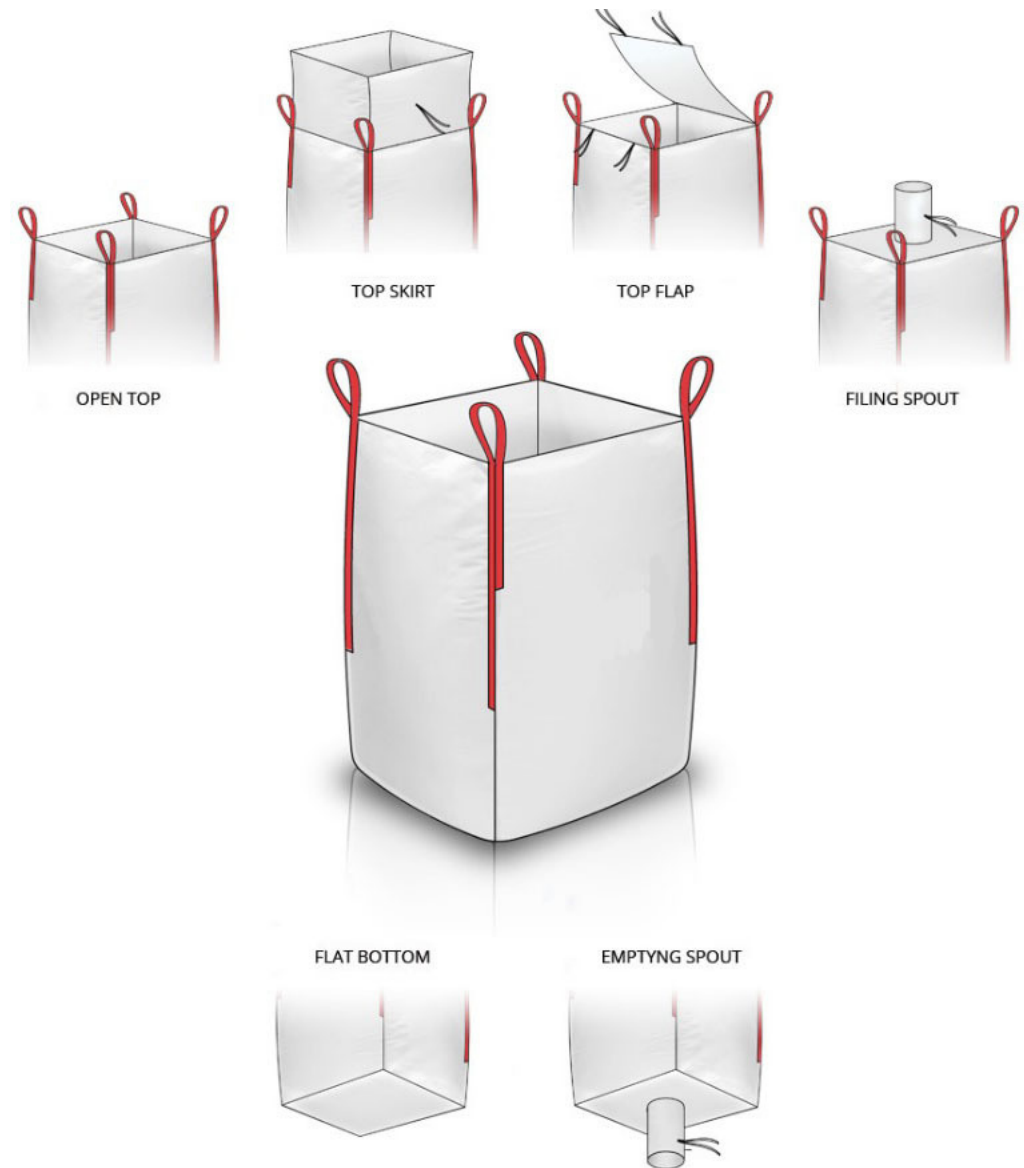

Baffle Bag

Conical Top / Bottom Bag

4 loop bag

UN bags

Antistatic conductive bags

FEATURES OF JUMBO BAGS MADE BY US.

Safe Working Load (SWL): 500 kilograms. to 2500 kilograms

Size: As per customer requirements

Safety Factor: 5:1 or 6:1 as per customer requirements

Material: PP UV stabilized

PE Liner: 40-100 Micron thickness

Quality: All our bags are made as per industry standard

PE TARPAULINS

PE Tarpaulins are made of High Quality PE Fabric. Water proof, stabilized against ultraviolet rays & excess heat for long outdoor exposure.

Type : Reinforced PE Tarpaulin

Material: Made with HDPE fabric with both sides LDPE Lamination

Weave : up to 60x60 ft

Material Weight : starting from 100 gsm - 480 gsm

Treatment : Stabilized against ultraviolet rays & excess heat for long outdoor exposure. Max 5% loss on original tensile strength under ISO1421 after 1500 hours UV Under ASTM 653/94

Tensile Strength: Min 600 N both directions of warp and weft (BS 2576, 50mm grab test or equivalent)

Tear Strength : Min 100 N both directions (BS 4303 Wing Tear or equivalent)

Flammability : Above 200 C Flash

Point Grommets : Provided with strong aluminum eyelets on 4 sides of the single sheet at 100 cms (+/-5cm) intervals center to center and reinforced with nylon ropes in hem.

PP WOVEN SACKS

We can offer our customers the best quality products. Our offer comprises of various types of bags and sacks. We make polypropylene woven bags and sacks according to our customer's specifications, concerning dimensions and weights. PP Woven bags are the traditional bags in packaging industry due to their wide variety of usage, flexibility and strength.

ADVANTAGES

- Very affordable, lower cost
- Flexible and high strength, persistent durability
- Can be printed on both sides
- Water and dust proof design due to inside PE liners or laminated on the outside hence, packed materials are protected from outside humidity
- Twisted weave and anti-skid print to prevent slipping
- Fully recyclable

APPLICATIONS

- Chemicals, fertilizers, cement, urea, minerals, resin, polymers, rubber
- Flour, grain, seeds, spices, pulses, dates, agro products, fish meal, cattle feed
 - Sugar, salt
 - Sand, metal parts, concrete elements
 - Fruits, vegetables
 - Mails / letters / documents

PLASTIC PALLET

The Plastic pallets are easy to clean, and are very suitable for internal production, storage, conveyor belt, quick freezing and transport of heavy goods. They are characterised by closed deck and bottom in moulded runners. plastic pallets are mostly used in the pharmaceutical sector and in food industries.

FEATURES

- Strong & Durable
- Impervious To Acids, Fats, Solvents & Odors Resist
- Water Absorption & Bacteria Growth Consistently
- Dimension ally Accurate
- No Repairing
- Eco Friendly
- Easy to Clean
- Suitable For Pharmaceuticals

VCI PAPER ROLLS

Vapor Corrosion Inhibitor VCI Paper provides anti-corrosion protection for increased life of your tools, metal components, machined parts and any item that is prone to oxidation.

Protection: protects metals for up to 5 years when properly packed and stored.

Shelf Life: 2 years if stored at 85 degrees F (30 degrees C) or less and out of direct sunlight in original packaging.

TYPES

- Bio - Degradable Desiccants
- Seaworthy Packing System
- Transparent Seaworthy Packing System
- Seaworthy Packing for Open Deck Transportation
- Seaworthy Packing System for Steel Coil

OTHER PACKAGING PRODUCTS

Moreover, we offer the best and most competitive distribution of various range of 'Plastic and Packaging products' to meet the requirements of our clients.

We ensure supply of excellent products of high quality at a very competitive price, prompt delivery and flexible services through our uncompromising commitment.
